

STATE OF CHRONIC DISEASE IN CALIFORNIA

Health care disparities create undue and significant hurdles for patients in need and disproportionately impact individuals with chronic conditions. It is critical that all patients have equal access to health care services independent of age, ethnicity, socio-economic status or health status.

CHRONIC DISEASE IN THE U.S.

LEADING CHRONIC DISEASES IN CALIFORNIA

ACCESS

23% of rural Americans say access to good doctors and hospitals is a major problem, compared with 18% of urbanites and 9% of suburbanites.¹¹

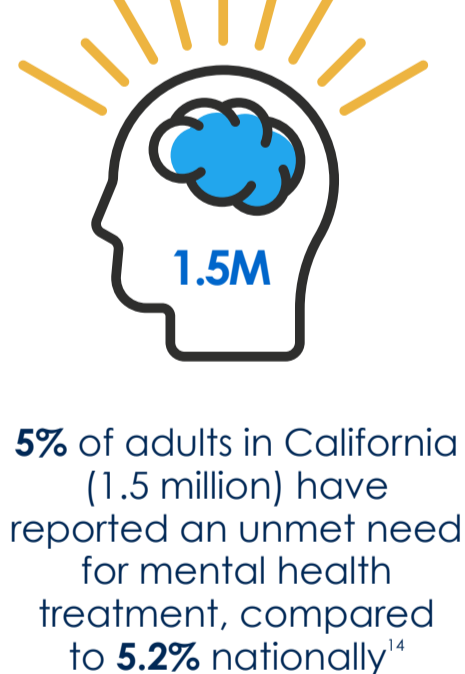

Rural Americans live an average of 10.5 miles from the nearest hospital, compared with 5.6 for people in suburban areas and 4.4 for those in urban areas.¹¹

It takes Californians an average of 11.4 minutes by car to travel to the nearest hospital, compared to 12.9 minutes nationally.¹¹

There are 282 Medicare certified rural health clinics¹³ in California, serving more than 837,000 Californians living in rural areas.¹²

A wave of rural hospital closures in recent years have raised concerns about access to health care. 64 rural hospitals closed between 2013 and 2017, more than twice the number of closures in the previous five-year period.¹¹
